

Skyboard X Seat Board Skylotec

Product information

Adjustable work seat with ergonomically shaped and padded seat. The seat is equipped with gear loops on each side, for tools etc.

Attach it to your sit harness with the two feather-light parachute carabiners. Suitable for work at extended periods of time. When not in use, you can attach the seat board to the harness with a rear snap.

Material: Polyester, Polyamide, Aluminium

Temperature range: -35°C up to 45°C.

Note: Only for use with Skylotec harnesses with EN 813 approval. The work seat is not part of the PPE, and therefore must never be used as the sole system. As a redundant safety system to the seat board, always use an additional catching system. A slip down into the harness must always be expected. When using it for rope-supported work, always observe the applicable rules of the government safety organisations regarding service life. The use of the work seat is only permitted to persons, who are skilled in rope-supported work, able to determine the working and protection distances according to the rules of the government safety organisations, and in a suitable health condition. The work seat is dimensioned for persons weighing up to 200 kg and disposes of two material eyelets.
