Cross Braided Nylon

Product information

For universal purposes in industry, civil engineering and shipping.
Design: Braided.
Specific gravity: 1,14 g/cm^3.
Melting point: 260°C.
Elongation: High.
Strength wet/dry: 85%/100%.
Shock absorption: Excellent.
Water absorption: Yes.
Abrasion resistance: Very good.
Standard: EN 696.

Material: UV-stabilised Polyamid.
Finish: Standard colour white, others on request.
