Anti-slip Mat Kargotec® Special Plus

Product information

Further improved, versatile anti-slip mat.
Kargotec® Spezial Plus is an anti-slip mat for securing the load, which is distinguished by good kinetic friction values. They are also used successfully as intermediate layer pads in the packaging industry.
Very high permissible surface pressure.

Thicknesses: 8 mm.
Max. permissible surface load (at max. 30% compression): approx. 180 t/m^2 at 3 mm thickness, approx. 290 t/m^2 at 8 mm thickness.
Kinetic friction coefficient μ: 0.81 at 3, 4, 5, 6, 8, 10 mm thickness.
Elongation at break: At least 60% (DIN EN ISO 1798).

... *Read more*

Material: Recycled rubber crumbs (particle size 1 – 3 mm), bonded with polyurethane.
Temperature range: -30°C up to +100°C
Finish: Black with coloured speckles
