Anti-slip Mat Kargotec® Secure

Product information

Anti-slip mat for extremely heavy loads.
Kargotec® secure is the anti-slip mat for heavy loads. The combination of an exceptionally high surface load capacity (max. 500 t/m^2 *) and an excellent kinetic friction coefficient (μ = 0.80) makes this product the first choice when it comes to securing extremely heavy loads.
Highest permissible surface pressure.

Thickness: 8 mm, 10 mm.
Max. permissible surface load: (at max. 30% compression) approx. 500 t/m^2 at 8, 10 mm thickness.
Kinetic friction coefficient μ 0.80 at 8 and 10 mm thickness.
Elongation at break: At least 80% (DIN EN ISO 1798).

Features: Registered colour coding system (black with blue and white speckles)
Material: Recycled rubber crumbs, bonded with polyurethane
Temperature range: -30°C up to +100°C
Finish: Grain texturing
