

Vacuum Beam AERO-PORO

Product information

With the vacuum lifting beam AERO-PORO you can handle board material like MDF or OSB boards, whether closed or air-permeable.

Thanks to the optional 90° swivel gear, stepless and jerk-free swiveling, as well as horizontal handling, are possible. The mechanical connection with the galvanized steel adapter plates makes suction plate replacement and rotation (90°) easy.

Product variants

The AERO-PORO vacuum lifter is available in different versions with:

- Load capacities from 300 to 900 kg
- From 1 up to 3 suction plates
- With 2 up to 4 crossbars
- Different crossbar and handle lengths, etc.

We will be happy to advise you on selecting the right device for your application.
