Remote Control eMINI Elebia

Product information

The eMINI is a small and compact remote control. It can be integrated into a glove or used with a wrist band to wear it as a watch.

With this remote, the operator can open and close the automatic hook and control its battery level.

The eMINI also informs of the hook's annual inspection and displays sensor information and maintenance messages.

It is a small but powerful remote control for crane hooks, compatible with all cranes and other remotes.
