

Selantic Sling

Product information

Sling designed especially for heavy on- and offshore lifting, subsea installation, mooring, tethering or project-specific lifting.

Materials: Aramid, HMPE LCP or blends.

Jacket: Cordura® cut resistant cover, and special design wear protection in critical areas.

Capacity: 1 to >2000 Te MBL.

Length: 0,8 to 150 m.

Length tolerance: $\pm 0,15\%$ of nominal length.

Certifications: DNV, CEN and ILO.

Features

- Lightweight and flexible
- Safe and easy to handle
- No damage to painted surfaces
- Durable construction
- Heat resistant and non conductive
- Available with fluorescent jacket for subsea applications
- Design optimization through material selection

Rope construction: Parallel laid endless filaments.
