Aluminum Monobeam Spreaders PALF ALU

Product information

The PALF ALU aluminum monobeam spreader is a fixed or adjustable lifting spreader for handling loads with synthetic slings, cables or similar lifting accessories. It is designed for industrial lifting applications requiring articulated rotating hooks, tear-resistant eyelets and controlled hook positioning. Equipped with 2 articulated, rotaring hooks with forged safety latches.

Best used for:

- Lifting operations requiring an aluminum monobeam spreader up to 3000 kg.
- Applications using synthetic slings, chain slings or wire rope assemblies.

Product benefits:

- Articulated rotating hooks improve load connection flexibility.
- Forged safety latches support secure hook engagement.
- Tear-resistant eyelets suit synthetic slings and cables.
- No structural welds and FEM 5 classification support demanding industrial use.
- Delivered with user's and maintenance manual and EC certificate of compliance
