Fixed Spreader Beams PALF

Product information

The PALF fixed spreader beam is designed for lifting loads while maintaining controlled spacing between lifting points. It is suited to industrial handling operations using synthetic slings, wire ropes or similar lifting accessories, with articulated rotating hooks supporting flexible load connection and alignment. Equipped with 2 articulated rotaring hooks with forged safety latches.

Best used for:

- Repetitive lifting operations with a fixed lifting geometry.
- Handling loads with synthetic slings, chain slings or wire rope assemblies.

Product benefits:

- Fixed beam design supports repeatable lifting setups.
- Articulated rotating hooks improve load connection flexibility.
- Forged safety latches support secure hook engagement.
- Tear-resistant eyelets suit slings, cables and wire ropes.
- No structural welds and FEM 5 classification support demanding industrial use.
- Delivered with user's and maintenance manual and EC certificate of compliance
