Guided Fall Arrester SKN BFD SK12 Skylotec

Product information

The SKYLOTEC SKN BFD SK12 is a guided type fall arrester with an integrated energy absorber designed for use on flexible anchor lines. It is suitable for both vertical climbing applications and horizontal work where fall edges are present, providing continuous fall protection while allowing freedom of movement along the rope. Approved for users up to 140kg.

Best used for:

- Vertical access, ladder climbing, and work positioning on structures.
- Horizontal work near roof edges, platforms, and other certified edge-risk environments.

Product benefits:

- Integrated energy absorber helps reduce arrest forces during a fall.
- Edge-approved design supports work near certified fall edges.
- Suitable for both vertical and horizontal applications.
- Approved for user weights up to 140 kg.
- 12 mm polyamide rope and steel components provide durable service life
