Adjustable ECO Lifting Beams PALECOR

Product information

The PALECOR Adjustable ECO Lifting Beam is a low-headroom spreader beam designed for lifting loads with variable attachment point spacing. Adjustable hook positions allow the beam to accommodate different load dimensions while maintaining balanced lifting and efficient load handling.

Best used for:

- Lifting operations where load attachment points vary between jobs.
- Industrial environments requiring a low-headroom adjustable lifting beam.

Product benefits:

- Adjustable hook positions support flexible load configuration.
- Articulated rotating hooks improve load connection alignment.
- Forged safety latches help secure lifting attachments.
- Tear-resistant lifting eye suits slings, ropes and cables.
- Delivered with user's and maintenance manual and EC certificate of compliance
