

## Felco Wire Rope Cutter

### Product information

Cut both hard-drawn wire like steel-, copper- and aluminum wires, electric cables and multi wire ropes. The cutting edges are shaped to form a grip of the rope, in shape of a triangle when cutting which prevents un-twisting of the rope end. The edges are made in alloy steel of coromanttype. The cutters are provided with plastic handles.

| Part code    | Code | Rope Ø range<br>mm | Length<br>mm | Weight<br>kg | Delivery time |
|--------------|------|--------------------|--------------|--------------|---------------|
| 141500700010 | C7   | 7                  | 190          | 0.3          | 10            |
